All batteries can cause property damage and/or bodily injury such as burns if a conductive material touches exposed battery terminals when inserted in a non-conductive case or pocket. Some NiMH or AA batteries may contain small amount of NiMH material in the terminals and may cause skin irritation or burns when handled regularly. Be sure to always handle batteries properly.

Note: To communicate, all radios in your group must be set to the same channel and Interference Eliminator Code. To talk, press and hold the PTT button. When transmitting, Power Boost is not applicable for model T400.

Changing the Weather Mode
1. Turn the radio OFF.
2. With the back of the radio facing you, loosen the retaining screw on the battery door and open the cover.
3. Loosen the three AA alkaline batteries to the radio.
4. To reduce the risk of damage to the cord or plug, pull the plug slowly.
5. To reduce the risk of electric shock, unplug the charger when it is not in use. If the plug is damaged, call customer service at 1-800-418-FORM (3676) or 1-888-CALL-FCC (225-5322) for assistance.

Installing the NiMH Rechargeable Battery Pack
1. This device may not cause interference, and 2. This device must accept any interference received, including interference that may cause undesired operation of the device.

Note: To avoid interference with other electronic devices, you may need to reduce the volume if you operate more than one TalkAbout radio in the same area.

Installing the Micro-USB Charger
This device complies with Industry Canada licence-exempt RSS standards. Operation is subject to the following conditions:

1. This device may not cause interference, and 2. This device must accept any interference received, including interference that may cause undesired operation of the device.

Note: This device is designed to maintain performance and improve RF energy handling characteristics. Do not use the radio lower than the set frequency.

Power Boost
To boost the power of your radio to high power, press the top of the PTT button while talking. If you are near a snow-covered area, you can reduce the energy of your battery by pressing the top part of the PTT button. This allows you to adjust the volume. For more information, see the instructions on the control screen before you leave.

Power Capping
A micro-USB cable is not applicable for model T400.

Master Button
Pressing and holding the Master button for three seconds allows you to listen and when using a personal, hands-free operation, this allows you to adjust the volume.

Push-to-Talk-Timed Silence
To prevent accidental transmission, save battery life, the radio ends in continuous silence after one minute per FCC policy 6000 3000. This speed allows you to adjust the volume. For more information, see the instructions on the control screen before you leave.

Selecting the Channel
This device is compliant with FCC rules and is used for special mobile radio (SMR) service. It is not authorized for operation in private land mobile and fixed services as certified by an organization representative of the user of those services. Authorization for this radio could violate FCC rules. For more information, see the instructions on the control screen before you leave.

Installing the Batteries
With the back of the radio facing you, insert the batteries and make sure they are turned clockwise until the retaining screw on the battery door is tight. The battery door must be tightly closed over the nickel metal hydride battery.

Installing the Three AA Alkaline Batteries
1. Turn the radio OFF.
2. With the back of the radio facing you, loosen the retaining screw on the battery door and open the cover.
3. Insert three AA alkaline batteries and screw the cover back in place.

Nano-USB Controls
The nano-USB controls are used to charge NiMH batteries when the battery door is opened.

Driving Screen Guide
The radio is powered on. Mark is used to indicate the status of the radio. When the radio is on a 1.5 watts power transmission, the display shows . When the radio is on a 1 watts power transmission, the display shows . When the radio is on a 1/4 watts power transmission, the display shows . When the radio is on a 1/8 watts power transmission, the display shows . When the radio is off, the display shows . When the radio is in standby mode, the display shows .

Powering On/Off
Press and hold  for three seconds while talking and 0 will be displayed continuously. This allows you to adjust the volume.

Installing the NK2 Rechargeable Battery Pack (Optional Accessory)
1. Insert the NK2 battery pack after the nano-USB cable is removed. Do not remove, install or charge batteries in such areas. Sparks in a blasting area, or in areas posted "Turn off two-way radios". Obey blasting area rules and regulations.

Selecting the Channel
The channel display is shown on the control screen. Channels 8 and 9 are not used for two-way voice communications. Channel 16 is used for emergency communications. Free talking (no channel number displayed) is used in critical situations.

FCC Licensing Information
1. This device may not cause interference, and 2. This device must accept any interference received, including interference that may cause undesired operation of the device.

Important: Before using this radio, refer to the important operating instructions for safe usage and RF energy awareness and adhere to the following procedure:

1. Attach the belt clip to the Talkabout plate at the back of the radio in a vertical position with the microphone facing the front of the face.
2. Hold the radio in a horizontal position and place it on your lap or nearby the microphone is not touching your skin.

Operational Cautions
• Hold the radio in a horizontal position and place it on your lap or nearby the microphone is not touching your skin.
• Transmit no more than 50% of the time.
• To receive calls, release the PTT button.

Operational Cautions
• Turn your radio OFF immediately if there is any reason to believe the radio is being jammed or interfered with.
• Exercise care when removing NiMH or AA batteries. Do not remove NiMH batteries with a screwdriver. Doing so may result in damage to the battery.

Operational Cautions
• Use hands-free operation, if available.
• Transmit no more than 50% of the time.
• To receive calls, release the PTT button.

Operational Cautions
• Use a radio in a horizontal position on your lap or nearby the microphone is not touching your skin.
• Transmit no more than 50% of the time.
• To receive calls, release the PTT button.

Operational Cautions
• Turn your radio OFF immediately if there is any reason to believe the radio is being jammed or interfered with.
• Exercise care when removing NiMH or AA batteries. Do not remove NiMH batteries with a screwdriver. Doing so may result in damage to the battery.

Setting and Transferring Call Tones
If your radio is able to receive call tones via two-way mode or other Motorola Talkabout interference elimination system, the following information will be useful for setting and transferring call tones.

Setting Call Tones
1. Press and hold the flashing button. A code, from the list, is displayed. The code is the call tone.
2. Press to select the desired code. The call tone is now set.
3. The call tone will be transmitted when there is an incoming call.
