Receive emergency/weather broadcasts from the NOAA National Weather Service. When in Emergency/Weather mode, the system monitors the selected emergency/weather channel for alerts when not communicating.
- **ROGER BEEP**
Lets others know when you finish your transmission.
- **EMERGENCY STROBE**

TRU•WATERPROOF™

TRU•WATERPROOF™ combines rugged durability with watertight construction to create a radio that can take on the most extreme outdoor conditions. These products meet the tough JIS7* water intrusion test in which the product is submerged at a depth of 3 feet for 30 minutes. Whether hiking, biking, boating or hunting wild game, Uniden GMRS/FRS 2-Way Radios provide the reliable communications you need to stay connected during any outdoor activity.

**The FCC requires GMRS operators to have a license. No license is required for operation on FRS channels 8-14 or any channel in Canada. *Unit is not waterproof when using headsets.

Actual range may vary depending on environmental and terrain conditions. Due to FCC requirements, the maximum range can only be achieved on the GMRS channels (1-7 and 15-22) allowing for increased power.

Package Includes: 2 Radios, 2 Headsets, 2 Carabiner Clips, 2 Belt Clips, 2 Rechargeable Battery Packs, Charging Cradle, AC Adapter and Printed Materials.
